Notes: Average monthly caseload numbers are based on annual expenditure files as compiled by HHS, ACF, Office of Legislative Affairs and Budget (OLAB) except that CRS made minor adjustments to the Title IV-E adoption assistance caseload to reflect corrections or other changes provided to CRS by a small number of states. All data were rounded to the nearest 100 for display. However, whenever more precise data were available, those data were used to calculate the rates shown. Child population (under age 18) used to calculate rate was based on U.S. Census Bureau annual estimates for July 1 of each year for the 50 states and D.C. only. Puerto Rico began participating in the Title IV-E program in FY1999. Any Title IV-E caseload data reported by Puerto Rico are included in the caseload numbers shown in the table, but those data were excluded from calculation of rate.

a. Beginning in FY2009, states could elect to provide Title IV-E kinship guardianship assistance. The number shown in this column includes those assisted via Title IV-E kinship guardianship assistance, including 100 in FY2009, 3,600 in FY2010 and 3,600 in FY2011. The FY2011 data are known to be incomplete as not all states that claimed this reimbursement reported the number of children who received the assistance.
